POINTCAST GO

**Bring Reliable Connectivity Everywhere You Go.**

POINTCAST GO

PointCast Go offers the best of both worlds: **portability** and **reliable connectivity** across challenging environments. Designed for instant activation with its auto-pointing antenna, PointCast Go is easy to assemble without the need for technical experts and outperforms manually pointed Vsat terminals by delivering stronger signals thanks to its high accuracy pointing controls.

Users can experience high-speed connectivity within minutes and leverage its portability and reliability for a wide array of use cases anytime, anywhere.

EACH POINTCAST GO INCLUDES

Antenna dish (75 cm)

Device stand consisting of a tripod and mini pole

Auto Pointing Control Unit and Modem

Transceiver (3W) and Foldable arm

Protective Case Packaging

PORTABLE, INTUITIVE SOLUTION THAT DELIVERS INSTANT, HIGH-SPEED INTERNET.

PointCast Go serves as a cost-effective, high-performance connectivity solution for enterprises, organisations, and various industries operating in remote or isolated environments where ground infrastructure might be compromised or where existing connectivity limitations exist.

From disaster relief to remote offices in construction, live broadcast reporting and healthcare missions – experience portable on-demand connectivity wherever you go with PointCast Go.

HOW DOES IT WORK?
